Irrigation System Installation

Requirements:

1. Lot or area to be irrigated must be drawn to scale and stamped (3 Copies).
2. Proper pipe sizing and the furthest head must be calculated.
3. Spray heads and rotor heads must be identified.
4. Main or pressure line be SCH40.
5. All zone pipes can be class 200.
6. Run time calculations according to the Texas Precipitation Rate Region map for each zone must be provided.
7. Rain sensor must installed.
8. Direct burial wire and wire nuts must be used and connections tapes with electrical tape.
9. Only one valve/box.

Inspections – First:

1. POC (Point of Connection)
2. Backflow Test (use City form) Water will not be permitted to be turned on until the City receives this test report.

Inspections – Second:

Inspect all zones of the system in operation. This inspection looks for water waste and necessary nozzle adjustments.
