Addendum to Roofing Permit Application

As a part of the application for a roofing permit, the applicant shall submit a written statement signed by the owner and/or the person having the legal right to occupy the premises where the roofing materials are to be installed.

In the event that the applicant is unable to obtain the owner's or legal occupant's statement at the time of filing the permit application by reason of the owner's or occupant's absence from the property or other circumstance making it impossible for the applicant to obtain the statement in a timely manner, and if, in the sound judgment of the Building Official or his or her designee, a delay in the issuance of a permit and subsequent replacement or repair of the subject roof might result in damage to the property or other irreparable harm or injury to the owner or legal occupant, then the applicant may execute an affidavit of inability to obtain the necessary statement and of intent to obtain and submit the same within a period of seven days. Upon the filing of the affidavit together with an otherwise complete application and upon determining that the applicant would otherwise be entitled to the issuance of a permit, the city shall issue a provisional permit which shall be valid for a period of seven days from the date of issuance.

The holder of a provisional permit shall obtain and submit the required owner's/occupant's statement within the seven-day period. If the statement is not filed with the city within the time specified, the provisional permit shall lapse; and any roofing materials installed as of that date pursuant to the provisional permit shall be deemed to have been installed without a permit. The installation shall constitute a violation of this code, and the city and its officers and agents shall enforce the terms and provisions of this section as hereinafter specified for unpermitted installations of roofing materials.
